

UX Designer

Versatile, experienced professional with an unusually broad range of skills – equally comfortable discussing design, business, and technology – and a flair for attentive client service.

"... rare combination of artistic savvy and tech wizardry ..."

"... creative, patient and a great communicator ..."

"... seamless project from start to finish."

CAPABILITIES **User Experience Research, Interaction Design, and Information Architecture:** Conduct interviews, audit and analyze processes, assemble and visualize data, and apply findings to project goals. Create site architectures and task flows, with a user-centric approach based on business goals.

Content Strategy and Migration: Able to see big picture along with keen attention to small detail. Management of content migration for site updates, online assets, and copywriting and copy editing.

Graphic Design and Production: Creative in website design, redesign, expansion, and maintenance. Strong capabilities with visual design, color, photography, and typography.

Training and Presenting: Dedicated to training clients by providing step-by-step, empathetic instruction; an articulate presenter to teams and stakeholders.
